

# Dehumidifier

## High-efficient dehumidifier that squeezes out the moisture from the air, the house and the laundry!

7 out of 10 houses has a too high moisture content and need to be dehumidified. Mitsubishi Electric's high-efficient dehumidifier squeezes the moisture out of the air, the house and the laundry!

During summertime the humidity is high outside and therefore we also have a higher humidity indoors. Our

activities in our homes - cooking, laundry and showering, increases the humidity.

Our dehumidifier is quiet, energy efficient and easy to move around. Perfect for the laundry room, the boat, the caravan, the garage or the summer house.

# Product Information

## Moisture exists

When the temperature drops in the fall, make sure to check that the humidity not gets too high in poorly ventilated areas. A relative humidity of 50-60% is desirable. Warm air contains more water vapor than cold - when the air cools down, the excess water falls on cold spaces, for example windows and walls. This condensation damages your house and in time even yourself. In regular basements, the relative dehumidification can be more than 80%. In poorly drained basements and poorly ventilated areas the humidity can be even higher. Toxic molds can form and cause asthma, infections, rashes and irritate the mucous membrane. Dust mites that cause allergies also thrive well in moist environments.

The moisture comes from both outside, drainage ratio, ventilation and through evaporation from drying clothes, cooking, plants, baths, showers and from us humans.

## Electricity-efficient dehumidification

Dehumidifiers from Mitsubishi Electric are among the absolute best deal available on the Swedish market and with the latest innovative technology. Mitsubishi Electric Scandinavia is one of the world's premier manufacturer of dehumidifiers and invests large resources in developing reliable, energy-efficient products with easy to use features.

## Dehumidifier

<b>Model designation</b>	<b>MJ-E14CG-S1-SWE</b>	
Power Supply	Single Phase 220-240 V, 50 Hz	
Dehumidifying Capacity* (liter/day)	14	
Power Consumption (W)	260	
Watertank Capacity	Automatically stops at approx. 3,8 liter (Also continuously drainage with drainage pipe)	
Weight (kg)	11,7	
Dimensions (mm)	H x W x D	570 x 384 x 187
<b>Functions</b>		
Low Temperature Performance	Hot Gas Defrost	
Air Filters	Yes	
Laundry Drying with 12 Hour Timer	Yes	
Multi Directional Airflow Swing Louvre	Wide / Upward / Rear	
Humidity Indicator	50 - 55 - 60 - 65 - 70% RH, Auto Mode	
Timer	1 - 9 hours On/Off Timer	
Child Lock	Yes	
Continuous Drainage	Yes	
<b>Funktionslägen</b>		
Easy Dehumidifying	Takes away the humidity-feeling in the air	
Intelligent Laundry	Automatically stops when the laundry is dry	
Low	Dehumidifier is on regardless of humidity level	
Mildew Guard	Inside-drying daily to prevent mildew growth	
Low Temperature	Is on continuously and automatically checks the air flow	
Auto	Automatic	
Air Purifier - Only air purifier, dehumidifier function off	Sterilization with silver ION and deodorizing filter	

\* The dehumidifying capacity is a value obtained when the dehumidifier is continuously run at a room temperature of 30°C and humidity of 80%. It indicates the amount of dehumidification per day (24 hours).
